EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interviews with Larry Roach on 8/31/04 and 9/1/04.

The application has been amended as follows:

In the claims:

Cancel claim 6.

Claim 7 lines 6-7 delete ", which is formed by out-diffusion from the strap region and the first plate,"

Claim 7 line 40 delete "from" and replace therewith --form--

Claim 9 line 2 after "to form" insert --the--

2. The following is an examiner's statement of reasons for allowance: Prior art of record fails to teach, disclose, or suggest, either alone or in combination, a method of forming an array of memory cells as claimed. The preambles of method claim 7 includes numerous details of the device to be formed. The body of the method claim recites some of the structures of the preamble and thus breathes life and meaning into the preamble. Thus, the structure recited in the preamble is considered limiting to the method claimed. That is, the scope of the claims includes performing the claimed

Art Unit: 2815

process steps on the device with the specific structure claimed in the preamble. The preamble includes all the structural limitations of the device claims that were patented in the parent case (application number 09/731,343) and thus the method for forming this patented device is also patentable. The prior art fails to teach an insulating layer surrounding the first plate on all sides except for a selected portion of just one side including the process steps recited of forming shallow trench isolation regions to partially define locations where the strap region is to be formed, forming a mask to define the side of the trench to include the strap region, and removing the silicon nitride and thick silicon oxide layers on the exposed sidewall of the trench.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Gruening et al. (U.S. Patent No. 6,204,140 B1), Mandelman et al. (U.S. Patent No. 6,284,593 B1).
